

PUBLIC NOTICE

GOLDEN TRIANGLE STORAGE EXPANSION PROJECT

FEDERAL ENERGY REGULATORY COMMISSION • DOCKET NO. CP23-542-000

On September 12, 2023, Golden Triangle Storage, LLC (GTS or Golden Triangle), which is owned by Caliche Development Partners II, filed an application with the Federal Energy Regulatory Commission (FERC) for a Certificate of Public Convenience and Necessity regarding the proposed Golden Triangle Expansion Project (Expansion Project) in FERC Docket No. CP23-542-000 (the Application).

The Application seeks approval for GTS to construct, install, own, operate, and maintain two underground natural gas storage caverns, compression, and brine disposal facilities, and other appurtenant facilities to the existing Golden Triangle storage facility.

The Golden Triangle storage facility presently consists of two salt dome natural gas storage caverns, leaching and brine disposal facilities, and a compressor station housing three compressors (the Central Compressor Station), all located on an approximately 90-acre tract near Beaumont, Texas in Jefferson County (the Central Storage Site); and a 9.1-mile natural gas dual pipeline header system that extends from the Central Storage Site northeast into Orange County, Texas (the Pipeline Header and collectively, all facilities, including the Central Storage Site and Pipeline Header are hereafter referred to as the Existing Storage Facilities).

The Expansion Project will add approximately 14.4 billion cubic feet of new natural gas storage capacity to the Existing Storage Facilities and includes construction and operation of the following facilities:

- Two new salt dome natural gas storage caverns (Cavern 3 and Cavern 4).
- Well pad sites for Cavern 3 and Cavern 4.
- New facilities related to Cavern 3 and Cavern 4, including injection/withdrawal natural gas pipelines, a raw water supply pipeline, an instrument air pipeline, conduit runs for electrical and control systems, gas dehydration equipment, heaters, metering, and other process control equipment.
- A brine disposal well, well pad, and a brine disposal pipeline.
- 33,000-horsepower spark-ignited reciprocating piston engine-driven compression.
- New service corridors and permanent access roads.

The FERC Notice of Application will be mailed to affected landowners; municipal, state, and federal governments; Native American Tribes; and agencies involved in the Expansion Project. A copy of the Application and related resource reports are on file at the following public libraries:

- Main Downtown Library, 801 Pearl Street, Beaumont
- Elmo Willard Library, 3590 E Lucas Drive, Beaumont
- R.C. Miller Memorial Library, 1605 Dowlen Road, Beaumont
- Theodore Johns Library, 4255 Fannett Road, Beaumont

For further information on becoming an intervener in the FERC process and/or to obtain FERC's pamphlet titled "An Interstate Natural Gas Pipeline on My Land? What Do I Need to Know?" visit FERC's website at www.ferc.gov or contact FERC's Office of External Affairs at 1-866-208-3372 or by email at customer@ferc.gov. To receive assistance with disputes involving the construction and operation of FERC jurisdictional projects, landowners should contact FERC's Landowner Helpline toll-free at 1-877-337-2237 or by email at LandownerHelp@ferc.gov.
